### South River Mortgage Announces New Florida Branch

ANNAPOLIS, MD—South River Mortgage, LLC (SRM) announced its plans to expand into West Palm Beach, Florida. Even in a turbulent market, SRM is committed to expanding its reach. This new location will primarily function as an extension of the existing loan origination team in Annapolis, MD, offering proximity to new opportunities within a top production volume state.

According to Tyler Plack, President of SRM, “The impact of Florida is substantial.” Since obtaining its initial broker license in Florida in 2019, SRM consistently fosters high quality relationships in Florida by offering reverse mortgage products. Today, SRM also operates as a lender in Florida, offering its proprietary product, HomeForLife.

SRM has solidified its services in Florida in terms of active loan origination from its corporate headquarters, but the new location allows the organization to establish a physical presence in the community. The branch will create more jobs in the area and enable SRM to engage with the community similar to its efforts in the Annapolis area.

After many months of searching for properties in the state, the new branch will be located at 2737 South Dixie Highway. SRM is actively hiring, and qualified prospects interested in joining the team in either location may apply on <http://careers.southernrivermortgage.com>.
